

Project Name	OMDb Technical Tests	
Created By	Sam Black	
Creation Date	3/7/23	
Test Case Description	Test Steps	Expected Result
Validate URL	Navigate to the given URL for the app	The page should display properly
Search bar accepts user entry	Enter text into the search bar	Text appears in search bar upon typing
Search bar should display placeholder text	Start the app	The search bar should display placeholder text that disappears when the user enters text
Results appear after entering more than the minimum required characters	Enter single characters, one by one, until list populates	Cards should appear after the third character is entered
Only valid text produces a result	Enter random strings into the search bar that do not contain known words or numerical phrases	Cards should not appear
Movie cards appear after valid text is entered	Enter valid text into the search bar	Movie cards appear
Autocomplete functions properly	Enter partial movie name into the search bar	The list should populate with results containing the entered text
Autocomplete results correctly display movie cards	Click the search bar, click an autocomplete result	Movie cards containing only the autocompleted string should appear
Verify functionality of clicking a movie card	Populate the movie card result list and click on a card	The thumbnail image for the movie (if found) should maximize and be displayed on the screen, as well as the title of the movie underneath the image
Verify that list items contain correct content	Populate the movie card result list	The item should display an image (or placeholder), a date, and a title
Verify functionality of clicking a movie poster image	Populate the movie card result list, click on a card, then click on the poster	No change in what is displayed
List results reset upon changing entered text	Populate the movie card result list, click on a card, then delete a character in the search box	The list should reset and display only cards containing the new text, or the search bar if there are no matches
Movie cards properly display highlighting	Populate the card list, then hover over multiple cards	Each item in the list should display highlighting behind the card
Search bar highlights upon click	Click the search bar	The search bar should display a solid border
Pasting text into the search bar functions properly	Copy text from another window and paste it into the search bar	The list should populate with results containing the pasted text
Verify that results are not case-sensitive	Enter lowercase text into the search bar, delete it, then enter the same text upper-cased	The same results should display for each string
